## Zinc Chromate

<b>PRODUCT DESCRIPTION</b>	Anti corrosive zinc chromate alkyd primer.																																		
<b>RECOMMENDED USE</b>	Economic general purposes maintenance and new building primer suitable for use on superstructures and on steel surfaces not normally exposed to water immersion.																																		
<b>CHARACTERISTICS</b>	<ul style="list-style-type: none"> <li>• Fast dry alkyd primer.</li> <li>• To be recoated with conventional paint systems.</li> <li>• An economic primer for structural steel.</li> <li>• Pigmented with zinc chromate, free of lead and chrome pigments.</li> </ul>

<b>Application Methods</b>																																			
Airless Spray																																			
Nozzle Tip	Approx. 0.28 mm (0.011 inch)																																		
Nozzle Pressure	10 MPa (approx. 1400 psi)																																		
Conventional Spray																																			
Nozzle Tip	1.8 – 2.0 mm (0.071 – 0.079 inch)																																		
Nozzle Pressure	0.3 MPa (approx. 43 psi)																																		
Brush or Roller	Recommended																																		
<b>Mixing Ratio</b>	One component																																		
<b>Thinner</b>	FOXANER 006																																		
<b>Surface Temperature</b>	Should be 10°C – 49°C, at least 3°C above the dew point to prevent condensation																																		
<b>Drying Time</b>																																			
Touch Dry	2 hours at 25°C, 1 hour at 32°C																																		
Through Dry	8 hours at 25°C, 4 hour at 32°C																																		
To Topcoat																																			
Minimum	12 hours at 25°C, 7 hours at 32°C																																		
Maximum	Unlimited (roughened and dry)																																		
<b>SAFETY PRECAUTION</b>	<p>Keep away from heat, spark and Open flames. Avoid breathing of vapour on skin and eye contact. Keep container closed and store in cool, ventilated area when not in use. Proper ventilation and protective measures must be provided during mixing, application and drying, to keep vapour concentration within safe limits and to protect against toxic hazard. Necessary safety equipment must be used and ventilation requirements carefully observed, especially in confined or enclosed spaces, such as tank interior and building.</p>
